After upgrading machines to produce the smaller service indicator, some machines experienced software glitches resulting in the unintentional part reversion to the larger typeface, or a semi corrupted version of it. Also, the "up to 10g" is missing from the Worldwide up to 10g.

An interesting item, where the matrix has not been removed between stamps. Possibly, "Printers Waste", where the perforating blade has not been set correctly and not cut to the required depth, causing the matrix to be retained between stamps, at the beginning of a roll of stock
