As the overprint suggests - Laatste editie (Last edition) - this is the last stamps to be dispensed from these kiosks

With two designs of labels and two programmed values only, the small changes in the commemorative imprints were not enough to attract and maintain the interest of local and international collectors.

In October 2018, PostNL announced the completion of its pilot trial and the withdrawal of the three Intelligent AR postal kiosks in service. Following a study on the change in postal habits, PostNL concluded that many customers were interested in buying individual stamps from self-service machines. The trial started at the end of January 2017 with the installation of the first philatelic kiosk, with the code NL01, at Filateliebeurs 2017 in Hilversum

As a farewell, PostNL decided to install the three kiosks, for the last time, at Eindejaarsbeurs 2018, the main philatelic fair that is held annually, at the end of December, in Barneveld. However there was not enough space to locate the three machines next to the Collect Club stand, so they decided to delay the farewell until the Hilversum fair, in January 2019.
